

Training

RTL-Palvelut Oy gives educational services in electrical safety. In addition to open courses (see [course-list](#) in Finnish only) company supplies individual training, too.

Courses are up to date and will be performed with modern equipment and latest software. Additional material and devices are always the best available.

So far training is usually given in Finnish only, but courses in English are provided in demand.

For instance **SAFETY AT ELECTRICAL WORK according to EN 50110 (Finnis translation SFS 6002 and national obligatory requirements)**.

English courses concern obligatory national Safety in Electrical working SFS 6002 based on EN 50110-1, Operation of electrical installations (2013). One day turn-key training containing all services, material in English, test and certification card (valid 5 years) costs from 1.600 € excl. VAT for 1-10 persons.

Training takes place in Vantaa or in any customer's agency, factory etc.
